

Background

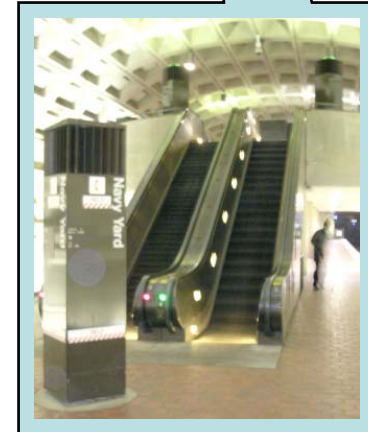

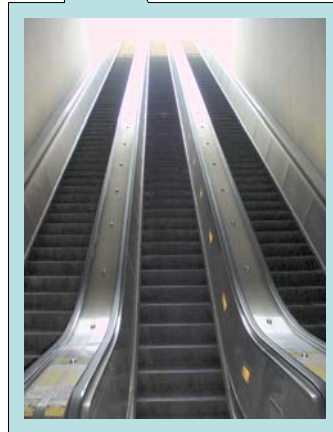

- Current west entrance has a capacity of 5,000 persons per hour;
- Goal is to increase the capacity to 15,000 persons per hour;
- Modifications to increase capacity include:
relocating the kiosk, fare gates and vending machines to the surface,
increasing the number of fare gates and vendors,
adding a new stair between the mezzanine and platform,
installing elevators from the surface to the platform;
- Modifications are being constructed as part of the construction of an office building over the entrance;
- The entrance will have to operate in one-way direction before and after games;
- Patrons traveling in a direction opposite the one-way direction would use the second entrance 2 blocks away;
- Work scheduled for completion on April 2, 2008.

Existing Entrance

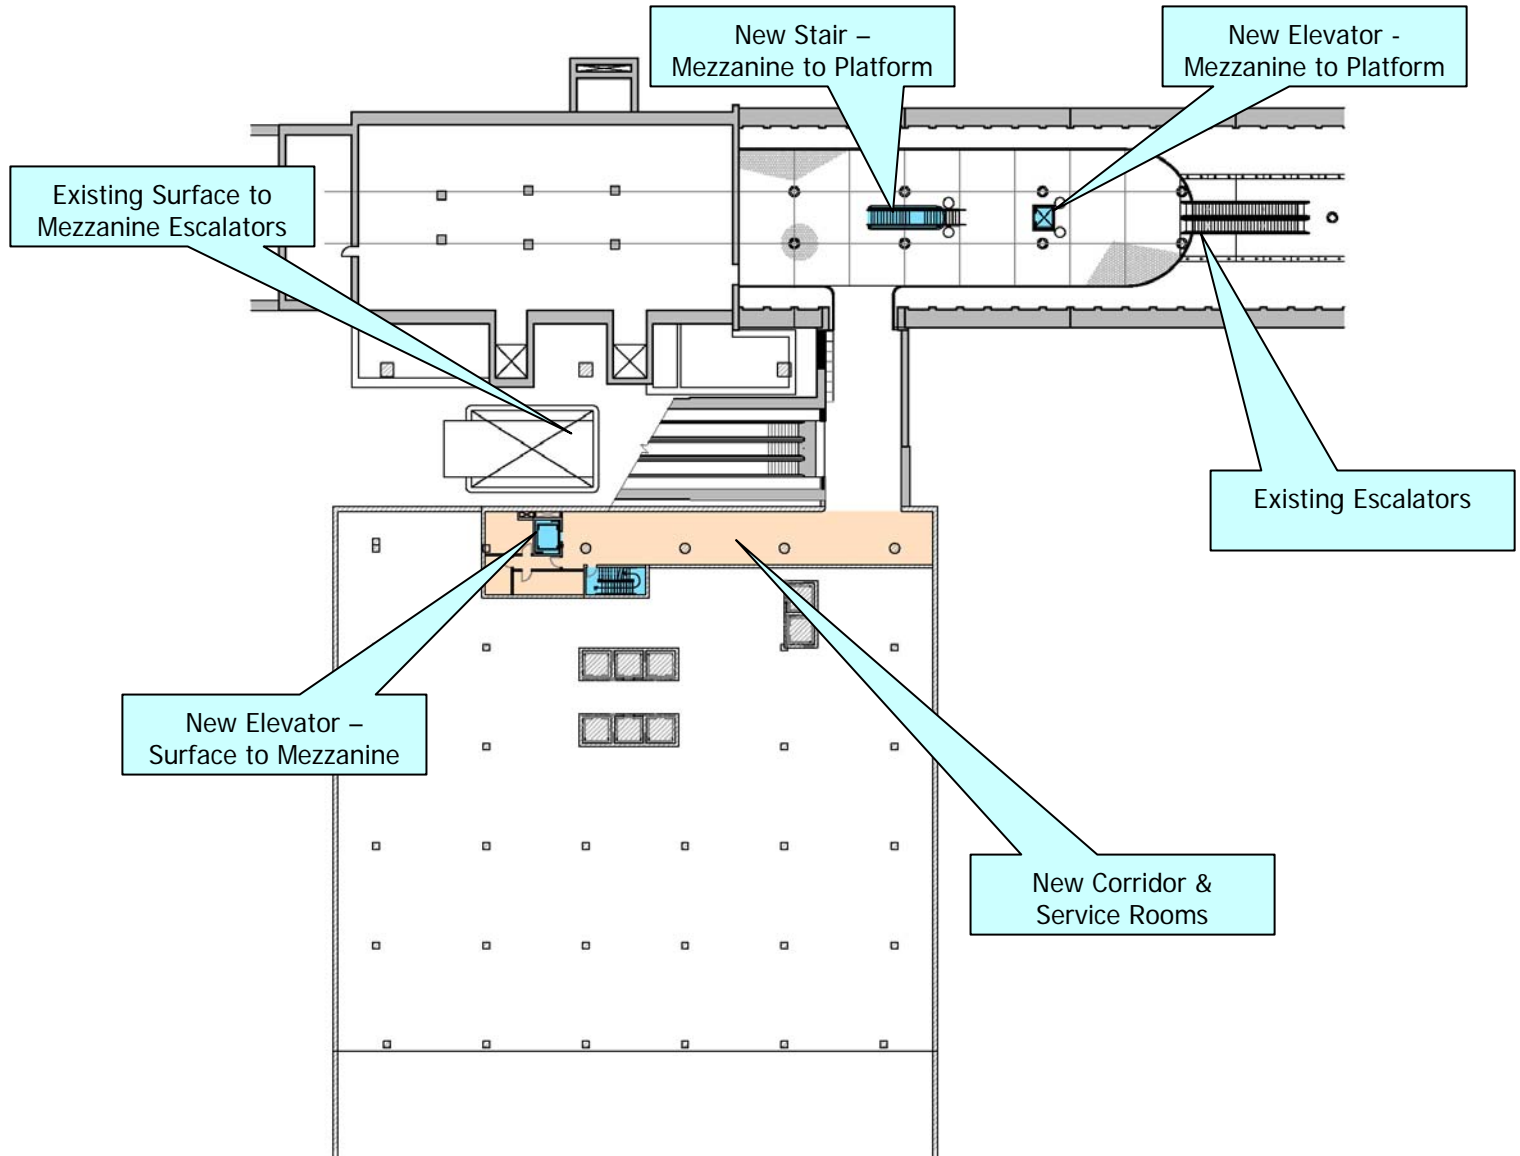

The maximum station capacity available is:
